

Anthony Moores – Director, Product Management

Product leader who treats a roadmap the way a driver treats a GPS: it holds the destination, and it reroutes the moment the world moves.

I make sure it can actually get there. That means three tests: whether the destination is right for now and for what we can and cannot see coming, whether the architecture underneath can carry it, and whether a change of direction would be a turn or a rebuild. Plenty of product people can validate a destination. Fewer can read the architecture underneath and say when it will not carry the plan. Across sales engineering and small-company CTO roles, I have performed many of the duties of a business analyst, an evangelist, a strategic account manager, a customer and partner advocate, an executive sponsor for project oversight, and a product manager.

- Hold product direction for a commerce platform at RETISIO, reconciling customer demand, market signal, and what engineering can actually build into one architectural direction.
- Ran the developer evangelism and adoption mission for Oracle CX Commerce across the Americas from a Director, Product Management seat.
- Operate among customers, partners, engineering and sales, none of whom want the same outcome, and turn that into priorities engineering can act on.
- Fed a vendor roadmap from the field at Mirakl, capturing US Marketplace Facilitator Tax requirements and acting as subject-matter expert for product development in Paris.
- Hired two practice leads at Professional Access, one to run the product-management process for OMS and one to run UX/UI practice offerings, and mentored, directed and assisted both.
- Turned unrepeatable post-sale workshop delivery into a cloud-based education program priced around \$5K per student.

Relevant Strengths

Platform Product Direction · Roadmap Judgment · Architectural Feasibility · Requirements from the Field · Multi-Constituency Prioritization · API & Integration Products · Composable Commerce · Marketplace Platforms · Executive Communication

Professional Experience

Chief Technology Officer: RETISIO Inc. | Frisco, TX | Jan 2022 – Present (Remote)

Lead technology strategy, platform architecture, product direction, and modernization for a composable digital commerce platform provider.

- Own long-term platform direction across API-first architecture, multi-tenancy, composable commerce, enterprise readiness, and agentic commerce readiness.
- Lead initiatives across OpenSearch, DevSecOps, CI/CD improvement, security hardening, platform modernization, and AI/ML enablement.
- Translate customer needs, market signals, and technical realities into roadmap and architectural direction.
- Support strategic customer and partner opportunities through executive-level architecture and platform communication.
- Mentor engineers and staff through structured architecture, testing, delivery, and product-thinking practices.

Consultant / Owner: TJM Solutions | Manchester, NH | July 2017 – Present (Remote)

Advise organizations on architecture, business process design, roadmap optimization, service development, technology adoption, and technical-business communication.

- Lead architecture, discovery, roadmap, and planning engagements for organizations evolving products, platforms, and service offerings.
- Designed microservice architecture for new product offerings for a Bangalore-based systems integrator, enabling access to key U.S. prospects.
- Developed go-to-market strategy for commerce and content services for a Fremont-based systems integrator startup.
- Developed technical marketing material for a Bangalore-based biotech startup seeking to attract U.S. investors.
- Supported education consulting and planning for a Boston-based product firm to increase partner onboarding and delivery quality.

Director, Product Management: Oracle | Cambridge, MA | Sept 2019 – Dec 2021 (Hybrid)

Led developer evangelism and adoption for Oracle CX Commerce across the Americas, performing many of the duties of a product manager across Oracle CX products.

- Operated among customers, partners, engineering, sales, and internal stakeholders to clarify platform needs and product direction.
- Managed customer advocacy and regional enhancement conversations.
- Supported developer relations, partner enablement, and customer-facing technical communication.
- Translated feedback into clearer priorities and more actionable roadmap discussions.

Anthony Moores – Director, Product Management

Principal Solutions Consultant: Mirakl | Somerville, MA | Sept 2018 – March 2019 (Hybrid)

Provided marketplace implementation, integration, education, and product-feedback consulting.

- Mapped HA/DR strategy for a major electronic component supplier, helping unblock a sale exceeding \$1M.
- Led roadmap and planning work with a major international retailer, helping rescue a four-year renewal valued above \$2M.
- Advised customers on ETL, taxonomy, MDM, REST/GraphQL/ESB orchestration, and omnichannel commerce integration.
- Captured U.S. Marketplace Facilitator Tax requirements and served as SME for Paris-based product development.
- Converted workshop material into a scalable cloud-based education program.

Chief Technology Officer: Professional Access | New York, NY | Dec 2014 – June 2017 (Hybrid)

Directed technical strategy and operations for an enterprise commerce systems integrator.

- Led technical strategy, technology adoption, technical evangelism, and operational consulting.
- Influenced more than \$50M in service-project sales and more than \$10M in renewal/expansion contracts.
- Hired the practice lead who ran the product-management process for OMS, and the practice lead for UX/UI offerings; mentored, directed and assisted both.
- Spearheaded UX/UI and OMS practice development.
- Expanded the commerce practice into Magento, commercetools, and custom microservices beyond Oracle Commerce.
- Supervised and mentored customer-facing technical employees in strategic products, technologies, and communication.

Master Principal Sales Consultant: Oracle | Cambridge, MA | March 2011 – Nov 2014 (Hybrid)

Supported strategic enterprise software opportunities and post-M&A technical/business alignment.

- Served as lead sales engineer on enterprise opportunities booking more than \$20M and \$9M, with multiple additional transactions exceeding \$3M each.
- Helped leadership map and adapt licensing, sizing, architecture, messaging, sales process, and business development after acquisitions.
- Trained and mentored new and acquired solution engineers.
- Connected technical fit, buying criteria, architecture, and business value in complex enterprise settings.

Anthony Moores – Director, Product Management

Principal Solution Engineer: ATG | Cambridge, MA | April 2005 – Feb 2011 (Hybrid)

Supported technical sales and platform strategy for enterprise commerce, search, and knowledge-management products.

- Led more than 40 transactions while mentoring six new solution engineers.
- Built and maintained reference architecture and sizing tools.
- Authored RFP/RFI responses, presentation materials, training documents, and custom demos.
- Catalyzed cross-product integration that improved product quality and revenue potential.

Technical Trainer: ATG | San Francisco, CA | Aug 2000 – April 2005 (On-Site)

Delivered enterprise software education to customers, partners, and employees.

- Re-engineered the primary offering for content, context, and efficiency.
- Authored tutorials, lab exercises, custom courses, and education pilots.
- Built classroom automation for onsite and offsite training environments.

Research Assistant: Dr. Barry K. Levine, Ph.D. | Potsdam, NY | Nov 1996 – Aug 2000 (On-Site)

Conducted applied machine-learning and chemometric research.

- Designed and developed software systems for chemical pattern recognition and exploratory data analysis.
- Developed techniques using genetic algorithms and principal component analysis.
- Co-authored journal publications; supported private-sector chemometric consulting.

Education

M.S. Computer Science, 2000

Clarkson University, Potsdam, NY

Thesis: *Hybrid Machine Learning*

B.S. Chemistry & Computer Science, 1999

Clarkson University, Potsdam, NY

Thesis: *Chemical Pattern Recognition by Genetic Algorithm*
