

Anthony Moores — Enterprise Applications & ERP

Enterprise software leader who owns the seam where commerce, order management, and AI-enabled capability meet the ERP estate.

I have spent more than twenty years designing, advising on, selling, integrating, and modernizing enterprise application environments. I designed configuration-time and runtime integrations between Oracle Fusion products and Oracle Commerce Cloud, and I have advised enterprise clients on architecture and implementation planning against Manhattan, SAP, Oracle Fusion, Oracle E-Business Suite, and homegrown ERP platforms, as a solution engineer at ATG and Oracle and as CTO of a systems integrator. My strength is defining where one system's responsibility ends and the next one begins, then turning that into a roadmap somebody can actually fund and execute. I came to that work from machine learning and have stayed close to it: my graduate research was in hybrid machine learning, and I now lead AI/ML enablement as a CTO and publish on where AI genuinely changes enterprise applications and where it only adds cost and risk.

- Designed configuration-time and runtime integration approaches connecting Oracle Fusion products with Oracle Commerce Cloud as Director of Product Management at Oracle.
- Advised enterprise clients across industries on planning integrations with Manhattan, SAP, Oracle Fusion, Oracle E-Business Suite, and homegrown ERP systems.
- Directed technology strategy for an enterprise systems integrator, contributing to more than \$50M in service-project sales and more than \$10M in renewals and expansions.
- Established Order Management Systems and UX/UI consulting practices, extending an integrator from commerce delivery into broader enterprise transformation work.
- Served as lead solution engineer on enterprise transactions exceeding \$20M and \$9M, and led more than 40 enterprise transactions earlier at ATG.
- Own platform and integration direction as CTO for RETISIO, where commerce has to fit into estates that already run ERP, OMS, and fulfillment systems.
- Lead AI/ML enablement as a CTO and publish current thinking on agentic commerce, AI governance, and where AI in enterprise applications delivers measurable value rather than cost and architectural risk.

Relevant Strengths

Enterprise Application Strategy · AI/ML Enablement · AI in Enterprise Applications · ERP and Commerce Integration · Oracle Fusion and E-Business Suite Ecosystems · SAP and Manhattan Integration Planning · Order Management and Fulfillment Architecture · Application Modernization · API and Event-Driven Architecture · Implementation Discovery and Planning · Partner and SI Enablement · Strategic Solution Consulting · Executive Stakeholder Leadership

Anthony Moores — Enterprise Applications & ERP

Professional Experience

Chief Technology Officer: RETISIO Inc. | Frisco, TX | Jan 2022 – Present (Remote)

Lead technology strategy, product direction, and architectural evolution for an enterprise commerce platform that has to operate inside complex customer application estates.

- Define long-term product and architecture direction across composable services, APIs, multi-tenancy, enterprise integration, security, scalability, and operational readiness.
- Guide how commerce capabilities integrate with the order management, fulfillment, customer, and other enterprise systems already running in a customer's estate.
- Translate customer operating models, integration constraints, and business requirements into solution architectures and roadmap priorities.
- Support strategic enterprise opportunities and partnerships through executive-level discovery, architecture, and implementation planning.
- Lead modernization spanning platform architecture, DevSecOps, CI/CD, search, security hardening, and AI/ML enablement.

Consultant / Owner: TJM Solutions | Manchester, NH | July 2017 – Present (Remote)

Advise organizations on enterprise architecture, application strategy, integration design, and technology-adoption decisions.

- Lead architecture, discovery, roadmap, and planning engagements for organizations modernizing platforms and the systems around them.
- Design integration and service boundaries for new product offerings at platform and systems-integration firms.
- Develop go-to-market strategy and content services for commerce and enterprise-software vendors.

Director, Product Management: Oracle | Cambridge, MA | Sept 2019 – Dec 2021 (Hybrid)

Led product management, developer enablement, and cross-product integration for Oracle CX Commerce across the Americas.

- Designed configuration-time and runtime integration approaches connecting Oracle Fusion products with Oracle Commerce Cloud.
- Defined integration requirements, product boundaries, setup experiences, and operational handoffs across Oracle application products.
- Worked across customers, implementation partners, product management, and engineering to turn enterprise application requirements into roadmap direction.
- Managed the regional enhancement pipeline and represented customer and partner priorities to Oracle product and engineering organizations.
- Supported developer relations, partner enablement, and implementation guidance for complex enterprise environments.

Anthony Moores — Enterprise Applications & ERP

Principal Solutions Consultant: Mirakl | Somerville, MA | Sept 2018 – March 2019 (Hybrid)

Advised enterprise customers on marketplace implementation strategy, integration architecture, and operational readiness.

- Led discovery, roadmap, and project-planning workshops for enterprise marketplace programs.
- Helped customers define integration responsibilities among marketplace, commerce, ERP, order management, and fulfillment systems.
- Designed a high-availability and disaster-recovery strategy that helped unblock a \$1M+ opportunity.
- Supported a multi-year, multimillion-dollar renewal through detailed roadmap and implementation planning.
- Converted implementation workshop material into a repeatable, revenue-producing customer and partner education program.

Chief Technology Officer: Professional Access | New York, NY | Dec 2014 – June 2017 (Hybrid)

Directed technology strategy, architecture, and technical operations for a systems-integration firm specializing in enterprise commerce and the business applications around it.

- Advised clients on architecture and implementation planning involving Manhattan, SAP, Oracle Fusion, Oracle E-Business Suite, and homegrown ERP environments.
- Helped clients define integration strategy across ERP, commerce, order management, inventory, fulfillment, and customer systems.
- Established new Order Management Systems and UX/UI consulting practices.
- Expanded the technology portfolio beyond Oracle Commerce to Magento, commercetools, and custom microservices, so customers could modernize without a single-vendor replacement program.
- Contributed to the sale of more than \$50M in service projects and more than \$10M in renewals and expansions.

Anthony Moores — Enterprise Applications & ERP

Master Principal Sales Consultant: Oracle | Cambridge, MA | March 2011 – Nov 2014 (Hybrid)

Led technical and business solution strategy for major enterprise commerce, marketing, service, and customer-experience opportunities.

- Advised enterprise clients on planning integrations between Oracle Commerce and Manhattan, SAP, Oracle Fusion, Oracle E-Business Suite, and homegrown ERP platforms.
- Ran business and technical discovery covering enterprise processes, system responsibilities, integration dependencies, architecture, sizing, and licensing.
- Served as lead solution engineer on enterprise transactions exceeding \$20M and \$9M, and supported several additional opportunities above \$3M.
- Helped integrate acquired products into Oracle's common architecture, licensing, sizing, messaging, and business-development processes.
- Trained and mentored solution engineers across established and acquired Oracle product organizations.

Principal Solution Engineer: ATG | Cambridge, MA | April 2005 – Feb 2011 (Hybrid)

Supported enterprise commerce, search, and knowledge-management opportunities through discovery, solution architecture, integration planning, and technical sales leadership.

- Consulted with enterprise clients on connecting ATG Commerce to SAP, Manhattan, Oracle, and homegrown back-office systems.
- Identified application responsibilities, integration points, solution components, sizing, and licensing requirements.
- Built reference architectures, sizing tools, demonstrations, and RFP/RFI responses.
- Led more than 40 enterprise transactions while mentoring six new solution engineers.

Education

M.S. Computer Science, 2000

Clarkson University, Potsdam, NY

Thesis: *Hybrid Machine Learning*

B.S. Chemistry & Computer Science, 1999

Clarkson University, Potsdam, NY

Thesis: *Chemical Pattern Recognition by Genetic Algorithm*
